

MoMoCUBE® – The Fast and Flexible Event System.

MoMoCUBE®

Mobile. Modular. Flexible. Attractive. Versatile.

MoMoCUBE® – Countless Possibilities.

Mobile

A high-quality cube with the standard dimensions of a 20-foot container forms the basic element of the modular system for events and trade shows. Transport is easily accomplished by truck and the cube can be assembled and dismantled in very little time – indoors as well as outdoors.

Modular

Attach the modules to the form that precisely suits your event and the circumstances of the environment. When multiple cubes are coupled together, the joint on the upper surface is sealed with a watertight sealing strip.

Versatile

Lounge

Shop

Ticketing

Toilets

MoMoCUBE® – Customized and Mobile.

Attractive

The fittings are variable and can be customized according to the client's requirements. The standard interior fittings showcase a number of possible variants. However, countless other possibilities are available.

Parquet and sideboard in oak

2-way glass door entrance

High-quality interior fittings with parquet flooring and shelving system

Canopy with lamella design

Flexible

Each individual cube can be coupled with other units on the front and sides. Its appearance can be configured and customized to suit any event according to individual preferences and needs.

A competency center for temporary structures built up with eleven MoMoCUBES

MoMoCUBE® in Operation.

Mercedes used 28 MoMoCUBES to create a spacious unit, including a rooftop terrace, in the F1 paddock club area during the Formula 1 GP races 2010 in Europe.

Siemens also installed the MoMoCUBE for its exhibition stand at the InnoTrans 2012 in Berlin. The two-story trade fair booth consisted of 13 coupled cubes in total.

The six stylish meeting rooms of Plasser & Theurer at the 2013 International Exhibition for Track Technology (IAF) in Münster were made with eight coupled MoMoCUBES.

An effective roadshow consisted of six MoMoCUBES for Pantene 2016 in Munich.
