# Our Expo Solutions

An appearance at the world's fair is a big deal; therefore, the role of the pavilion is altogether pivotal. As the star of the show, so to speak, it transfers the message. It conveys enthusiasm.

We effect impressive constructional implementations of pavilion and exhibition designs of agencies, architects, designers and scenographers – from a fancy façade for eye-catching appearances to a completely designed exhibition or turnkey Expo pavilion. A free-form type of pavilion gives architects, designers, and scenographers maximum freedom in terms of design and material usage. The NUSSLI engineers are experts in redefining the limits of construction feasibility.

# Expert in Expo Pavilions

Working closely with clients and creative partners, NUSSLI realizes pavilions and exhibitions that seem impossible at first glance. The experts of NUSSLI create pavilions and exhibitions from all conceivable designs and space profiles – with wood, steel, or other materials. Their experience with unique projects allows them to implement their know how direct-

ly – economically, creatively, sustainable, and reliably. The NUSSLI experts can support with specific advice or expertise during all or one of the phases of the pavilion’s delivery. The crew is experienced in construction engineering and project management under tight deadlines and high expectations, equipping them to handle the on-site situation early on.
